

Table 1. ESC/EACTS 2025 GL on valvular heart disease. Recommendations on indications for intervention in tricuspid stenosis

Surgery in symptomatic patients with severe tricuspid stenosis. ^a	I C
--	-----

Surgery in patients with severe tricuspid stenosis undergoing left-sided valve intervention. ^b	I C
---	-----

a Percutaneous balloon valvuloplasty can be attempted as a first approach if tricuspid stenosis is isolated.

b Percutaneous balloon valvuloplasty can be attempted if PMC can be performed on the mitral valve.
